

Curriculum Vitae
August, 2014

Personal Information

Name: Stephen L. Hillis

Addresses: Department of Radiology
1170 Medical Laboratories
The University of Iowa
200 Hawkins Drive
Iowa City, IA 52242-1077

Comprehensive Access and Delivery Research and Evaluation (CADRE)
Center
Department of Veterans Affairs (VA) Iowa City Medical Center
601 Highway 6 West (152)
Iowa City, IA 52246-2208

E-mail: steve-hillis@uiowa.edu

Telephone: Home (641) 472-9505
Work (319) 339-0851 x7680

Education

Postdoc	UI Psychiatric Epidemiology/Biometry Research Fellowship, 1992-1994
Postdoc	UI Cardiovascular Center Institutional Research Fellowship, 1991-1992
Ph.D.	Statistics, 1987 University of Iowa
M.S.	Statistics, 1982 University of Iowa
M.F.A.	Music, 1978 University of Iowa
B.A.	Mathematics and Music, 1972, University of Iowa

Awards and Honors

2010 American Orthopaedic Foot and Ankle Society Roger A. Mann, M.D.
Award for the outstanding clinical study (Amendola, A., Hillis, S.L., Stolley, M.D., Saltzman, C.
L., "Prospective randomized controlled trial of motion vs. fixed distraction in treatment of ankle
osteoarthritis")

2002 American Orthopaedic Foot & Ankle Society Leonard
Goldner Award for outstanding basic research (Tochigi, Y., Amendola, A., Rudert, M.J., Baer,
T.E., Brown, T.D., Hillis, S.L., Saltzman, C.L., "Direction of subtalar joint laxity with
interosseous, talocalcaneal ligament sectioning")

1997 Orthopaedic Research Society first annual William H. Harris Award
(Pedersen, D. R., Brown, T. D., Hillis, S. L., Callaghan, J. J., "Prediction of Long-Term

Polyethylene Wear in THA, Based on Early Wear Measurements Made Using Digital Image Analysis")

1982 National Endowment for the Arts Jazz Study Fellowship Grant
1971 Phi Beta Kappa, University of Iowa

Employment History

2011-present Senior Biostatistician
Comprehensive Access and Delivery Research and Evaluation (CADRE)
Center
Iowa City VA Health Care System, Iowa City, IA

2011-present Research Professor (secondary appointment)
Department of Biostatistics
University of Iowa, Iowa City, IA

2010-present Research Professor
Department of Radiology
University of Iowa, Iowa City, IA

2004-present Senior Biostatistician
Center for Research in the Implementation of Innovative Strategies in
Practice (CRIISP)
VA Medical Center, Iowa City, IA

2002-2004 Senior Biostatistician
Program for Interdisciplinary Research in Health Care Organization
VA Medical Center, Iowa City, IA

1994-2002 Director, Statistical Consulting Center
Department of Statistics and Actuarial Science
University of Iowa, Iowa City, IA

1992-1994 Psychiatric Epidemiology and Biometry Research Fellow
Division of Biostatistics, Department of Preventive Medicine
University of Iowa, Iowa City, IA

1991 Iowa Cardiovascular Center Institutional Research Fellow
Division of Biostatistics, Department of Preventive Medicine
University of Iowa, Iowa City, IA

1987-91 Assistant Professor of Statistics
Department of Mathematics and Statistics
The American University, Washington, DC

- 1988 Statistical Consultant
Public Interest Management Group, Inc.
Washington, DC
- 1983-1987 Teaching Assistant
Department of Statistics
University of Iowa, Iowa City, IA
- 1984-1986 Research Assistant
Preventive Medicine Department
University of Iowa, Iowa City, IA
(Primary statistician for a medical study conducted at the
University of Iowa Hospitals)
- 1986 Editorial Consultant for Professor Robert Woolson
Preventive Medicine Department
University of Iowa, Iowa City, IA
(Edited Robert Woolson's book *Statistical Methods for the
Analysis of Biomedical Data*, published by Wiley)
- 1981-1982 Teaching Assistant
Business Department
University of Iowa, Iowa City, IA
- 1980-1981 Teaching Assistant
Statistics Department
University of Iowa, Iowa City, IA
- 1979-1980 Visiting Artist
Music Department
Cornell College, Mt. Vernon, IA
- 1979 Teaching Assistant
Music Department
University of Miami, Coral Gables, FL
- 1975-1978 Teaching Assistant
Music Department
University of Iowa, Iowa City, IA
- 1972-1974 Quantico Marine Corps Band
Quantico, VA

Teaching at the University of Iowa

- 2001-2002 S:161 (Design II), S:173 (Data Analysis)

2000-2001	S:168 (Applied Multivariate Methods), S:173
1999-2000	S:161, S:173
1998-1999	S:161, S:173
1997-1998	S:168, S:173
1996-1997	S:161, S:168, S:173
1995-1996	S:168, S:173, S:172 (Generalized Linear Models)

Professional Memberships

American Statistical Association
Biometric Society

Publications in Peer-Reviewed Journals

(Statistical Methodology)

1. Gallas BD, **Hillis SL** (in press). Generalized Roe and Metz ROC model: analytic link between simulated decision scores and empirical AUC variances and covariances. *Journal of Medical Imaging*.
2. **Hillis SL** (2014). A marginal-mean ANOVA approach for analyzing multireader multicase radiological imaging data. *Statistics in Medicine*, 33, 330-360. doi: 10.1002/sim.5926
3. Obuchowski NA, Gallas BD, **Hillis SL** (2012) Multi-reader ROC Studies with Split-plot Designs: A Comparison of Statistical Methods. *Academic Radiology*, 19, 1508-1517. doi: 10.1016/j.acra.2012.09.012
4. **Hillis SL**, Metz CE (2012). An Analytic Expression for the Binormal Partial Area under the ROC Curve. *Academic Radiology* 19, 1491-1498. doi: 10.1016/j.acra.2012.09.009
5. **Hillis SL**. (2012) Simulation of Unequal-Variance Binormal Multireader ROC Decision Data: An Extension of the Roe and Metz Simulation Model. *Academic Radiology*, 19, 1518-1528. doi: 10.1016/j.acra.2012.09.011
6. Zanca F, **Hillis SL**, Claus F, Van Ongeval C, Cells V, Provoost V, Yoon HJ, Bosmans H (2012). Correlation of free-response and receiver-operating-characteristic area-under-the-curve estimates: Results from independently conducted FROC/ROC studies in mammography. *Medical Physics*, 39, 5917-5929.
7. Obuchowski NA, **Hillis SL** (2011). Sample Size Tables for Computer Aided Detection (CAD) Studies, *American Journal of Roentgenology*, 197, W821-827.
8. **Hillis SL**, Obuchowski NA, Berbaum KS (2011). Power estimation for multireader ROC methods: an updated and unified approach, *Academic Radiology*, 18, 129-142.

9. **Hillis SL, Berbaum KS (2011)** Using the mean-to-sigma ratio as a measure of the improperness of binormal ROC curves, *Academic Radiology*, 18, 143-153.
10. **Hillis SL, Berbaum KS, Metz CE (2008)** Recent developments in the Dorfman-Berbaum-Metz procedure for multireader ROC study analysis, *Academic Radiology*, 15:647-661.
11. **Hillis SL (2007)** A comparison of denominator degrees of freedom methods for multiple observer ROC analysis, *Statistics in Medicine*, 26:596-619.
12. **Hillis SL, Berbaum KS (2005)** Monte Carlo validation of the Dorfman-Berbaum-Metz method using normalized pseudovalues and less data-based model simplification, *Academic Radiology*, 12:1534-1541.
13. **Hillis SL, Obuchowski NA, Scharz KM, Berbaum KS (2005)** A comparison of the Dorfman-Berbaum-Metz and Obuchowski-Rockette Methods for receiver operating characteristic (ROC) data, *Statistics in Medicine*, 24:1579-1607.
14. **Hillis SL, Berbaum KS (2004)** Power estimation for the Dorfman-Berbaum-Metz method, *Academic Radiology*, 11, 1260-1273.
15. **Obuchowski NA, Beiden SV, Berbaum KS, Hillis SL, Ishwaran H, Song HH, Wagner RF (2004)** Multi-case ROC analyses: an empirical comparison of five methods. *Academic Radiology*, 11, 980-995.
16. **Hillis SL & Woolson RF (1996)**. An iterative weighted least squares algorithm and simulation study for censored data M-estimators, *Communications in Statistics B*, 25, 247-262.
17. **Hillis SL (1995)**. Residual plots for the censored data linear regression model, *Statistics in Medicine*, 14, 2023-2036.
18. **Hillis SL & Davis, CS (1994)**. A simple justification of the iterative fitting procedure for generalized linear models, *The American Statistician*, 48, 288-289.
19. **Hillis SL (1994)**. A heuristic generalization of Smith's Buckley-James variance estimator, *Communications in Statistics B*, 23, 813-832.
20. **Hillis SL (1993)**. The equivalence of two Buckley-James variance estimators, *Communications in Statistics A*, 22, 479-484.
21. **Hillis SL (1993)**. A comparison of three Buckley-James variance estimators, *Communications in Statistics B*, 22, 955-974.
22. **Hillis SL (1991)**. Extending M-Estimation to Include Censored Data via James's Method, *Communications in Statistics B*, 20, 121-128.

Recent Presentations

1. **Hillis, SL**. Analysis of multi-reader-performance outcome data. Center for Devices and Radiological Health (CDRH), Federal Food and Drug Administration (FDA), Silver Spring, MD, invited lecture March 20, 2014.
2. **Hillis, SL**. A Simplifying Reformulation of the Binormal Likelihood-Ratio Model. ENAR 2014 Spring Meeting, Baltimore, MD, March 16-19, 2014.
3. **Hillis, SL**, Nishikawa, R and Samuelson, F. "ROC Analysis and Observer Studies to Evaluate Imaging Technology" day-long workshop at SPIE Medical Imaging conference, San Diego, February 15, 2014.
4. **Hillis, SL**. A simplifying reformulation of the likelihood-ratio binormal distribution. Presented as part of the invited session "Technology Assessment for informed Medical Decisionmaking: In Memory of Professor Charles E. Metz," 10th International Conference on Health Policy Statistics, Chicago, IL, October 9-11, 2013.
5. **Hillis, SL**. A simplifying characterization of the binormal likelihood-ratio distribution. Washington, DC, Medical Image Perception Conference XV, August 14-16, 2013.
6. **Hillis, SL**. A tribute to Charlie Metz and an assessment of the state of the art: a statistician's perspective. Presented as part of the invited workshop "Image Perception, Observer Performance, and Technology Assessment", SPIE Medical Imaging

Conference, Orlando, FL, February 7, 2013.

7. **Hillis, SL.** ANOVA Models for Nontraditional Multi-Reader Imaging Studies. Presented as part of the invited session “Advances in the Design and Analysis of Multi-reader Diagnostic Imaging Evaluation,” San Diego, CA, Joint Statistical Meetings, July 28 – August 2, 2012.
8. **Hillis, SL.** Analysis of Multi-Reader Diagnostic Imaging Data – the Marginal ANOVA Model Approach. Silver Spring, MD, Center for Devices and Radiological Health (CDRH), Federal Food and Drug Administration (FDA), April 5, 2012.
9. **Hillis, S.L.** Analysis of Multi-Reader Diagnostic Imaging Data. Department of Biostatistics, University of Iowa, September 12, 2011.
10. **Hillis, S.L.** Obuchowski-Rockette vs. Dorfman-Berbaum-Metz Reporting of Multi-Reader ROC, ROI, and FROC Analyses. Dublin, Ireland, Medical Image Perception Conference XIV, August 9-12, 2011.
11. **Hillis, S.L.,** Extending the Obuchowski-Rockette/Dorfman-Berbaum-Metz multireader ROC analysis method to other study designs. Seattle, WA, International Biometric Society WNAR Annual Meeting, June 20-23, 2010.
12. **Hillis, S.L, Berbaum, K.S.** Using the mean-to-digma ratio as a measure of the improperness of binormal ROC curves. New Orleans, LA, International Biometric Society ENAR Spring Meeting, March 21-24, 2010.
13. **Hillis, S.L, Berbaum, K.S.** Using the mean-to-sigma ratio to detect unacceptably improper ROC curves. Santa Barbara, CA, Medical Image Perception Conference XIII, October 19-21, 2009.
14. **Hillis, S.L, Berbaum, K.S.** Using the mean-to-sigma ratio to detect unacceptably improper ROC curves. Portland, OR, International Biometric Society WNAR Meeting, June 14-17, 2009.
15. **Hillis, S.L.** Reexamination and further development of the Roe and Metz simulation model for multiple reader ROC decision data. San Antonio, TX, International Biometric Society ENAR Spring Meeting, March 15-18, 2009.
16. **Hillis, S.L.** Using marginal ANOVA models to motivate, generalize, and derive properties for the Obuchowski-Rockette (OR) procedure for multireader ROC data analysis. Denver, CO, Joint Statistical Meetings, August 3-7, 2008.
17. **Hillis, S.L.** Using marginal ANOVA models to motivate, generalize, and derive properties for the Obuchowski-Rockette (OR) procedure for multireader ROC data analysis. Crystal City, VA, International Biometric Society ENAR Spring Meeting,

March 16-19, 2008.

18. **Hillis**, S.L. Using marginal ANOVA models to motivate, generalize, and derive properties for the Obuchowski-Rockette (OR) procedure for multireader ROC data analysis. Iowa City, IA, Medical Image Perception Conference, October 17-20, 2007.
19. **Hillis**, S.L, Berbaum K.S. Recent Developments in the Dorfman-Berbaum-Metz (DBM) Procedure for Multireader ROC study analysis. Montreal, Canada, XXIII International Biometric Conference, July 16-21, 2006.
20. **Hillis**, S.L, Berbaum K.S. Recent Developments in the Dorfman-Berbaum-Metz (DBM) Procedure for Multireader ROC study analysis. Tampa, FL, TX, International Biometric Society ENAR Spring Meeting, March 26-29, 2006.
21. **Hillis**, S.L, Berbaum K.S. Recent Developments in the Dorfman-Berbaum-Metz (DBM) Procedure for Multireader ROC study analysis. Windermere, UK, Medical Image Perception Conference XI, September 27-30, 2005.
22. **Hillis**, S.L Resolving the degrees of freedom issue concerning the Dorfman-Berbaum-Metz and Obuchowski-Rockette methods for receiver operating characteristic (ROC) data. Houston, TX, International Biometric Society ENAR Spring Meeting, March 20-23, 2005.

Dissertation Supervision

Supervised Nihaya Awartani's dissertation, completed in 1991 for the Mathematics and Statistics Department, The American University, Washington, D.C. Dr. Awartani presently is an assistant professor in the Department of Mathematics, An-Najah University, Nablus, West Bank.

Power and Sample-Size Methodology for Radiology Research

The long-term goal of this project is to provide a thorough statistical methodology appropriate for diagnostic radiological imaging research that accounts for both patient and reader variability. The objective of this application is to improve the power and sample size (P&SS) aspect of this methodology by pursuing the following four specific aims: (1) Develop a realistic and interpretable model for generating ROC decision data for evaluating the power and sample size methodology that emulates data from clinical studies. (2) Validate a new approach to power and sample-size calculation, 'confidence-level P&SS,' that takes into account unreliable pilot-study variance estimates. (3) Extend the methodology to include other designs. (4) Develop user-friendly, free stand-alone software for implementing the methodology.

Treatment Variations and Treatment Effectiveness in Veterans with Post Traumatic Stress Disorder Study

1 will examine the positive and negative/e predictive values, relative to data from, patients' medical records, of three alternative approaches to identify patients with PTSD using inpatient and outpatient administrative data. Study 2 will provide the most comprehensive description, to date, of national treatment -patterns of veterans with newly diagnosed PTSD during the first 12 months after diagnosis. Study 3 will identify first identify potentially important patient and organizational factors that are associated with the use of guideline concordant therapy.

Improving the Delivery of Smoking Cessation Guidelines in Hospitalized Veterans

The primary aim for this study is to determine the effectiveness of a nurse-initiated intervention, which couples low intensity inpatient counseling with sustained proactive telephone counseling, on cessation rates at 6 and 12 months after hospital discharge, compared to usual care. As the proposed implementation trial aims to increase quit rates by facilitating nurses' adoption and delivery of recommended cessation services, co-primary aims are 1) to determine whether the intervention improves the prescription of recommended pharmacotherapy for smoking cessation, and 2) to determine whether the intervention improves the referral of patients to telephone counseling (or other outpatient cessation counseling).

Bioburden Predictors of Diabetic Ulcer Complications

The major goals of the project are to 1) determine the prognostic efficacy of a) high microbial load, b) microbial diversity, and c) *Staphylococcus aureus* and anaerobes based on swab cultures obtained using Levine's technique in predicting infection-related complications among diabetic foot ulcers without signs of clinical infection; and 2) determine the extent to which combining microbiological dimensions will improve the predictive ability above any single dimension.

New Approaches to Assess and Forestall Osteoarthritis in Injured Joints

The goal is to develop new methods of forestalling post-traumatic osteoarthritis (PTOA) through a multi-disciplinary translational approach including basic science, bioengineering, imaging, and clinical research. The central theme is that joint injuries initiate a sequence of biologic events that lead to PTOA and that new treatments of joint injuries will minimize these deleterious events and promote joint healing.

The Business Case for Reduction in Surgical Complication Rates in the VA

The research will be the most comprehensive and generalizable analysis to date within VHA of the costs of surgical complications. In addition to providing system wide estimates, the research will also provide estimates of the potential cost savings within individual VAMCs, which may have different baseline complication rates and costs associated with specific complications. The study will also establish a template for similar “business case” analyses that link existing VHA data on quality and performance with data on the cost of care, measured by VHA’s cost accounting system.

Effectiveness of Care Coordination in Managing Medically Complex Patients

This study seeks to evaluate the efficacy of a home telehealth intervention for veterans enrolled in Primary Care Clinic with co-morbid diabetes and hypertension. Using a randomized controlled design, 330 patients will be enrolled. Intervention patients will use a messaging device to transmit clinical and health status data to a nurse case manager over 6 months. Nurses will monitor patients and, if necessary, implement interventions according to a standard protocol. Outcomes include HbA1c, blood pressure, quality of life, knowledge, self-efficacy, and adherence to medication.

Estimating the Magnitude of Unmeasured Risk in VA Patients

This two-year study will identify whether VA utilization is an independent risk factor for poor outcomes. Specifically, the study will: 1) compare outcomes of VA users and other patients who receive care in private sector hospitals for 10 high-volume medical and surgical diagnoses, adjusting for severity of illness; and 2) identify characteristics of VA users that are associated with poor outcomes and estimate the prognostic impact of these characteristics. The study will use Medicare administrative data, VA administrative data, and other existing data.
